ABSTRACT

The study aims to analyze the Consumer Perception towards Private Label Brands on Big Bazaar, Coimbatore. The objective of the study is to understand the possibility of success when retailers introduce private brands. The research is aimed to explore if buying choices are made based on brand loyalty and to analyze whether customers actively seek for new brands or strict to the old brands. A detailed study is conducted from the views of customers & collected by conducting a survey with a sample size of 150 (75 Fashion bazaar and 75 Food bazaar) from Coimbatore region with the help of structured questionnaire. The collected data is analyzed using statistical tools and the study reveals that most of the youngsters have good perception towards the private brandsin fashion wear & munchies. Majority of the respondents said that quality, trustworthy and brand image is the leading feature that differentiate private label brand with other branded product.

Keywords: Private Label, Fashion wear, Brand image, Brand loyalty

INTRODUCTION:

Private label brands are brands owned, controlled, and sold exclusively by a retailer (Baltas, 1997). The concept of private label brands was popularized by large corporate supermarket chains which expanded their private label business at the expense of some heavily advertised national brands and items (Stern, 1966).

India has not witnessed Private label brands before the liberalization of Indian economy in 1990's. Indian retail sector was unorganized and customers were relying on unorganized retailers almost for all the products. In early 1990s, Shoppers Stop pioneers the concept of private label in India and redefined the concept of 'shopping' by making efforts to provide the Indian consumers with an international shopping experience. It launched a STOP brand in India with the branded women ethnic wear.

With the growth of private label brands, national brands are grabbing the share from the national brands. Private labels are not only low priced but are also high on quality and offers high margin for the retailer.

Growth of organized retail chain in India has also facilitated the growth of private label brands in India. Indian economy has seen average growth rate of more than seven percent since 1994 and putting purchasing power in hands of customer. Though, initial growth of private label brands in India has been limited to certain categories like grocery and apparel, it is slowly expanding into other categories as well.

REVIEW OF LITERATURE:

The main reasons that have been cited in the business and academic press for retailers desire too stock private labels are (a) higher retail margins on private labels; (b) negotiating leverage with national brand manufacturers; and(c) higher consumer store loyalty (Hoch and Banerjee 1993). The private label brand choice is depending on 'experience', 'value', 'time utility', 'possession utility', 'mechanism' and 'place utility'. Hoch and Banerjee (1993) contested the common perception that a private label's primary attraction was the substantial price discount relative to the national brands, at which they were sold. They emphasized the role of quality in the private label purchase decision. They found evidence to support the notion that perceived quality was much more important than the level of price discount in determining the private-label category share. Several studies have examined the role of taste on the perceptions of private label brands.Sundel (1974) used a 'blind' (brands not identified) taste test and found that there were no significant differences in respondent ratings between national, regional and store brands of bread and canned corn. However, the national brands were still perceived by consumers to be superior to the regional or local store brands. Labeaga et al. (2007) contend that private labels assist building loyalty by differentiating the retailer. These brands are available at one retailer exclusively whilst manufacturer brands are available at many competing outlets. Regular consumers of private label brands are confronted with psychological costs when switching retailers as their preferred private label choice is no longer available. As a result, consumers who change retailers undergo demanding cognitive processes by evaluating other brands, including unfamiliar store brands, in choosing a new product. Consumers who purchase private label brands regularly do not only become loyal to that particular brand but also to the retailer through which it is sold (Collins and Burt, 2003). Among consumers, one obvious reason for their popularity and growth is their price advantage over national brands (Batra and Sinha, 2000). Nevertheless, high quality seems to be more important in determining PLB success than lower price (Hoch and Banerji, 1993). One of the interesting phenomena concerning PLBs is the fact that their growth has been highly uneven across product categories (Hoch and Banerji, 1993).

NEED FOR PRIVATE LABEL BRANDS:

As competition is becoming stiff, retailers are working on new marketing strategies to sustain in the market, one such strategy being private branding adopted by most of the retailer. Private brand is one of the strategies decisions for most of the retail organizations in recent years and hence many retailers' have introduced varieties of private label in different categories like apparel, food and grocery, health care, personal care, consumer durables, lifestyle etc. Major driving force behind introducing store brand is to ensure the customer store loyalty. This can be accomplished as brand is available only in specific stores.

RESEARCH METHODOLOGY:

SAMPLING METHOD, PROCEDURE AND SAMPLE SIZE:

The sample was collected from the Big Bazaar store at Coimbatore city of TamilNadu state of India. Coimbatore was selected because of the presence of organized retail stores and is considered as a right place for understanding the customers' opinion on private label brands.

A quota sampling procedure was used with a sample size of 150 respondents and the quota was fixed based on

income, gender and age which areequally divided between different departments of Big Bazaar. Data was collected by using a structured questionnaire and the questionnaire consist of both demographic variables and the questions related to private label brands. The questionnaire was self-administered at the store location. The reason for this data collection method is based on the theory that respondents are more attractive to the task of completing a questionnaire and provide more meaningful responses when they are in their shopping environment.

FINDINGS:

FASHION BAZAAR:

S.No	Presently in Use	Frequency	Percentage
1	Peter England	15	20
2	Lee Cooper	8	11
3	Louis Philip	6	8
4	Park Avenue	6	8
5	Raymond	4	5
6	Levis	16	21
7	John Player	10	13
8	Denim	3	4
9	Pepe Game	4	5
10	Purple	1	1
11	JayZ	1	1
12	Reebok	1	1
	Total	75	100

Table 1: (a) CONSUMERS CHOICE OF NATIONAL BRANDS INSTEAD OF PRIVATE BRANDS

From the table we can infer that 21% of the customers are using LEVIS, 20% of customers are using PETER ENGLAND, 13% of customers are using JOHN PLAYER, 11% of customers are using LEE COOPER and other brands have also been preferred.

TABLE 2:(a) RESPONDENTS PREFERENCE	ON BIG BAZAAR PRIVATE LABEL BRANDS

S.No	Knowledge about Brands	Frequency	Percentage
1	DJ&C	46	61
2	Knight Hood	8	11
3	Privilage Club	3	4
4	AFL	4	5
5	Spunk	8	11
6	Shristi	3	4
7	Riya&Ritu	3	4
	Total	75	100

In the classification of the private brands used by the respondents it was found that 61% of the respondents have preferred DJ&C, followed by Knight Hood and Spunk.

FOOD BAZAAR:

S.No	Knowledge about Brands	Frequency	Percentage
1	Tasty treat	24	32
2	Clean Mate	15	20
3	Care Mate	2	3
4	Fresh & Pure	4	5
5	Sach	5	7
6	Golden harvest	25	33
	Total	75	100

 Table 2: (b)
 RESPONDENTS PREFERENCE ON BIG BAZAAR PRIVATE LABEL BRANDS

In the classification of the private brands used by respondents in the Food Bazaar section, it was found that the Golden Harvest and Tasty Treat occupy the preference list of customers and Clean Mate also preferred by customers.

Table 3: (a) COMPETITIVE PRODUCTS FOR GOLDEN HARVEST

S.No	Products	Frequency	Percentage
1	Aashirvad	30	40
2	Annapurna	20	27
3	Pillsbury	15	20
4	Parry's Corner	10	13
	Total	75	100

From the above table we can easily identify the competitive products for GOLDEN HARVEST. AASHIRVAD is highly leading with other brands at 40%., followed by ANNAPURNA and PILLSBURY.

Table 4: (a) FACTORS INFLUENCING THE PURCHASE OF NATIONAL BRANDS

S. No	Categories	Frequency	Percentage
1	Quality	35	47
2	Price	17	23
3	Trust in Brand	4	5
4	Variety	8	11
5	Brand Image	6	8
6	Availability	3	4
7	Others	2	3
	Total	75	100

From the table we can find out that the factors influencing the purchase of national brands.47% of customers said they are influenced by quality in purchasing national brands, 23% are influenced by price and 11% are influenced by variety.

Table 4: (b) FACTORS INFLUENCING THE PURCHASE OF PLB

S.No	Categories	Frequency	Percentage
1	Quality	35	47
2	Price	25	33
3	Trust in Brand	4	5
4	Variety	6	8
5	Brand Image	3	4
6	Availability	2	3
	Total	75	100

Among the factors leading to the choice of private label product it was found that 47% of the respondents give preference to quality and 33% of the respondents feel that price of the product was the eminent factor that determines the choice of the private label brand. Trust in brand, variety, brand image and availability also played equal part in choice of private label product.

Table :	:3	EXPENSIVE BRAND
---------	----	------------------------

S.No	Categories	Frequency	Percentage
1	Private Brand	17	23
2	National Brand	58	77
Total		75	100

77% of consumers said national brands are expensive.

S.No	Categories	Frequency	Percentage
1	Yes	70	93

Researchers World 'Journal of Arts, Science & Commerce E-ISSN 2229-4686 = ISSN 2231-4172

2	No	5	7
Total		75	100

Out of the total respondents 93% of respondents think that private label brands are innovative as brand in terms of its offer to the shopper.

Table :5 CONSUMER PERCEPTION TOWARDS FUTURE PURCHASE OF PLB

S.No	Categories	Frequency	Percentage
1	Yes	50	67
2	No	25	33
Т	otal	75	100

From the table we can understand that 67% of customers believe that in future it is possible to purchase private label products.

BRAND PREFERENCE* AGE CROSS TABULATION

Hypothesis

Null Hypothesis (Ho): There is no significant relationship between segmentandpurpose of buying.

Alternative Hypothesis (H1): There is a significant relationship between segmentandpurpose of buying.

Crosstab										
			Age					Total		
			15-20	21-25	26-30	31-35	36-45	Total		
Qus3_fo_ b	Private Brand	Count	3	6	8	1	5	23

	National Brand	Count	4	10	12	9	15	50		
		Expected Count	4.8	11.0	13.7	6.8	13.7	50.0		
Total		Count	7	16	20	10	20	73		
		Expected Count	7.0	16.0	20.0	10.0	20.0	73.0		

CHI-SQUARE TESTS

	Value	df	Asymp. Sig. (2-sided)
Pearson Chi-Square	3.888 ^a	4	.421
Likelihood Ratio	4.326	4	.364
Linear-by-Linear Association	1.896	1	.169
N of Valid Cases	73		
a. 3 cells (30.0%) have expected cou	int less than 5. The m	inimum expected	d count is 2.21.

As 0.421<0.5, the null hypothesis is accepted and we inferred that there is a significant relationship between segment and purpose of buying.

CONCLUSION AND MANAGERIAL IMPLICATIONS:

From this study, one can come to the conclusion that private labels are able to position themselves significantly in the mind of customers and are gaining acceptance. Growth in specific private label segments like food and apparel segments are growing at a faster rate. While, the future of private labels is dependent on the retailer's ability to overcome key challenges such as adaptive supply chain practices, quality infrastructure, accelerated growth in new categories, blurring dividing lines between private label and national brands. From the study, it

International Refereed Research Journal Www.researchersworld.com Vol–III, Issue3(4), July 2012 [77]

Researchers World - Journal of Arts, Science & Commerce E-ISSN 2229-4686 = ISSN 2231-4172

was found that good quality, price, trustworthy, large variety are the most influencing factor which drive the customer to buy the private label brand. Therefore, these are the factors which should be considered while coming with the future private brand. This in return it will help the retail stores to increase sales.
